

Please do not seek to enact any law that would diminish Indiana's telephone privacy protection. Since Indiana's no call law was established, our quality of life has improved significantly. Any increase in unwanted calls would be an invasion of my family's privacy. We are not against a new law to protect the privacy of those who reside in states that are unable to enact their own no call laws. But protecting other state's residents absolutely MUST NOT lessen the stringency of Indiana's telephone privacy laws and their enforcement. Thank you.
